PROFILE

Program manager who helps teams adopt AI and improve how work gets done. At Ehoro Village, I develop AI-supported workflows, lead training, onboarding and documentation for adoption, and use learner data to guide improvements; course creation went from ~3 weeks to 4–7 days. Background in learning design and HCI (M.S., Michigan) and cross-functional program management at Procter & Gamble, including change management across 10+ teams, plus hands-on multi-agent workflows across Claude, ChatGPT, Gemini and DeepSeek.

EDUCATION

University of Michigan - M.S., Information - Human-Computer Interaction / UX Research & Design | 2022-2024
University of Michigan - B.A., Political Science & Computer Science | 2017-2021
Professional Scrum Master I (PSM I) - Scrum.org

CORE STRENGTHS AI Enablement & Adoption • Program Management • Change Management • Stakeholder Management • Instructional & Learning Design • Workflow & Process Design • Training & Onboarding

EXPERIENCE

EHORO VILLAGE | Program Manager, AI & Learning *Jun 2024 - Present*

- Translated an existing course-production process into a structured, AI-supported workflow in Claude Code across multiple instructional teams, cutting course creation from ~3 weeks to 4–7 days for 200+ students; wrote the guides, tip sheets and FAQs that drove adoption.
- Facilitated cross-functional alignment across engineering, design and product leads, running hands-on enablement workshops for 20+ internal champions.
- Helped increase internal AI usage from 18% to 47% through training, guides and workflow support.
- Led 5+ product teams and higher-education and corporate vendors to deliver Articulate learning modules on AI onboarding and financial literacy; learners who completed the onboarding module showed 35% higher 7-day retention.
- Managed delivery of a custom Python/Streamlit review tool, defining scope and specs to reduce manual content-review time by 18–37%.

UNIVERSITY OF MICHIGAN - BRAID | Product Designer & UX Researcher *Jan 2023 - May 2024*

- Led user research and delivery for a web redesign that increased new-user sign-ups by 40% within four weeks of launch.
- Turned 100+ interviews and surveys into 10+ product requirements and roadmaps in Jira.

PROCTER & GAMBLE | IT Project Manager *Jun 2021 - Jul 2022*

- Scaled an internal project-management framework to 10+ cross-functional teams through documentation, training and stakeholder support.
- Managed program delivery across 11 regional project managers on a global initiative responsible for $20M+ in operational savings.
- Received a P&G CEO Award for program impact.

SELECTED PROJECTS

BUILD WITH AI | Workshop on auditing AI-generated learning content

- Designed, facilitated and evaluated a 75-minute workshop for L&D and higher-ed practitioners, from needs analysis to facilitator guide, participant workbook, audit checklist and Rise module, built on a Frame, Generate, Audit, Log framework.
- In a two-person pilot, both participants caught more planted flaws with the audit checklist than without it; evaluated at Kirkpatrick levels 1–3, including a two-week follow-up.

AGENT WORKFLOW SYSTEM | Independent multi-agent build and operations workflow *Sep 2026 - Present*

- Directed a multi-agent build of an interactive web app (unreleased) in which one model made decisions, one planned, and others built and tested, governed by 30+ written decisions and 8 review gates; 349 commits in 14 days.
- Added a usage meter that stops agent runs before the limit, plus one lane per platform, written handoffs and human approval gates, after one run used 98% of a 5-hour window; the ticket-board workflow closed 148 tickets in its first 2 days.

SKILLS

AI & Enablement: Claude and Claude Code, ChatGPT, Gemini, DeepSeek, prompt design, human review and quality checks, adoption programs, champions training, multi-agent workflows

Learning & Program Delivery: Instructional design, needs analysis, action mapping, Bloom's taxonomy, Kirkpatrick evaluation, facilitator guides, job aids, Articulate Rise, Agile/Scrum (PSM I), Jira

Data & Build: Python, Streamlit, SQL, Qualtrics, JavaScript, Supabase, Git/GitHub, Figma
